General: In this course, we will examine differing theories as to how urban governance, administration, and politics actually operate. Included in this examination are a variety of major issues related to urban governance and administration including intergovernmental relations, urban service delivery, fragmentation of urban areas between cities and suburbs, the rise of sunbelt cities, urban sprawl, racism, poverty, crime, and national urban policy. We will also examine broader visions and proposals to revitalize and enhance urban living. Finally, we will consider the current state of urban politics and where it might go in the future.

Objectives:

1. To provide an overview and understanding of urban political structures, politics, and policy making in modern American cities.

2. To provide an overview of contemporary proposals to enhance the quality of living in urban areas.

3. To assess modern and contemporary theories of urban politics.

4. To allow students the opportunity to analyze urban policy making issues for a wide variety of urban issues.
